Vision 2020

HYUNDAI WELDING

Company Overview

Since its foundation in 1975, HYUNDAI WELDING has driven the Korean welding industry, demonstrating how to overcome adversity with our continued spirit of challenging limitations and mastering the power of execution.

Our combined efforts have provided many breakthroughs in technology, enabling HYUNDAI WELDING to become a leading innovator in the welding industry.

The slogan, 'Stands for Excellence' was founded on the concept of providing cutting-edge welding technologies to meet customers' welding demands. HYUNDAI WELDING is fully committed to comprehending the rapid changes in our customers' needs and innovating accordingly to provide exceptional, world class welding solutions. Thus, we have excelled among all of our global competitors.

The new vision of HYUNDAI WELDING, 'World's No. 1 Welding Brand', encapsulates our determination for future development. The vision of key domains is based on the four basic strategic orientations: Best Value in the World, Development and Innovation, Fostering a Talented Workforce, and Global Competency. With our new vision of being the 'World's No. 1 Welding Brand', we are striving to redefine all steel fabrication industries by providing better products and superior services.

Excellent Leader

As a 'Total Welding Solutions' company, HYUNDAI WELDING is striving to be the No.1 Global Welding Consumable and Equipment manufacturer. We maintain local and global networks by steadily expanding the 'end-to-end' welding value chains throughout all six continents.

Excellent Navigator

For more than 40 years, HYUNDAI WELDING has supported the most successful players in the steel fabrication industry, including the Automotive, Shipbuilding, Offshore Structures, EPC, Power Generation, and Construction industries. With our success in the Korean market, HYUNDAI WELDING is well positioned to enable the success of its partners in over 120 countries, securing their recognition and trust.

Excellent Workplace

HYUNDAI WELDING is entrenched in its core values of: Accountability, Honesty, and Respect. All employees at HYUNDAI WELDING work together with these core values in mind. Employees work in an inspirational environment with open communication to achieve their goals. Our management system ensures employees are able to achieve their full potential through our core values.

Excellent People

HYUNDAI WELDING seeks to realize its vision by harnessing the immense synergy created between the unique individual skill-sets of each employee. HYUNDAI WELDING offers qualified programs that promote mutual growth between the company and its employees, and also provides opportunities to learn new skills which will help them excel in the global market.

TECHNOLOGY ONE STEP AHEAD

World Class Research and Development

HYUNDAI WELDING works endlessly to ensure its products remain at the forefront of technology.

HYUNDAI WELDING is the world leader in the manufacturing of welding consumables and equipment. Our highly experienced team of engineers, metallurgists and technicians are working side-by-side with end-users and industry partners to research and develop a wide range of welding consumables.

HYUNDAI WELDING's core capabilities in welding technologies, combined with our skilled engineers active in state-of-the-art facilities, can deliver solutions for the most demanding and challenging welding environments. We take great pride in being the innovators that develop world class products that are helping to drive the industry.

Providing Trust with Promising Quality

HYUNDAI WELDING is committed to quality standards and continuous product development. Our advanced R&D facilities and experts bring the industry best quality and standards. HYUNDAI WELDING's QA technicians are the passionate experts who drive our level of service and quality.

Global Standards

All of our manufacturing is performed according to all International Standards-EN, AWS, ASME, JIS, etc. and HYUNDAI WELDING is currently ISO 9001 (since 1994,) ISO 14001 (since 2004) and ISO/TS 16949 (since 2004) certified.

Quality Standards

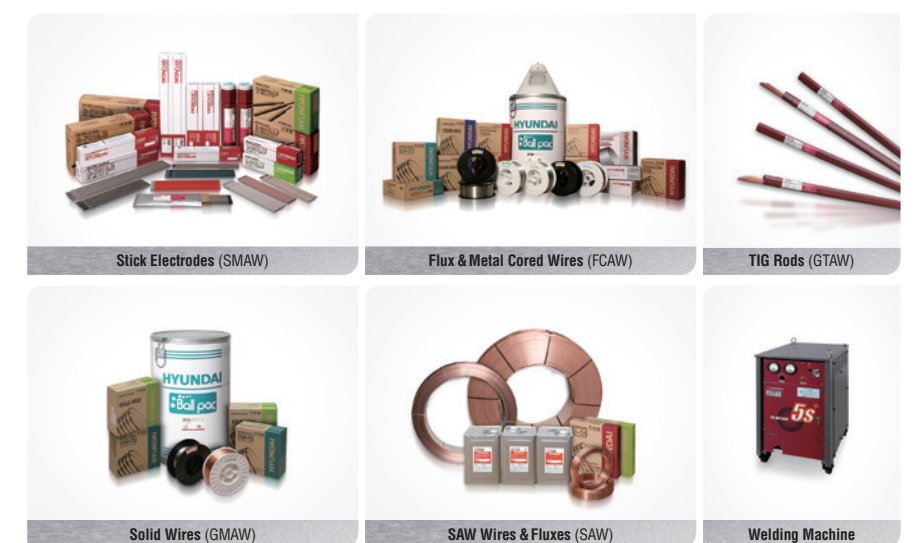

We have acquired approvals from the following international societies: ABS, LR, DNV-GL, BV, NK, KR, CWB, TUV, DB, RINA, CRS, CCRS, RS, RRR, NAKS, UKRACEF, FBTS, TURK LOYDU, and CCS.

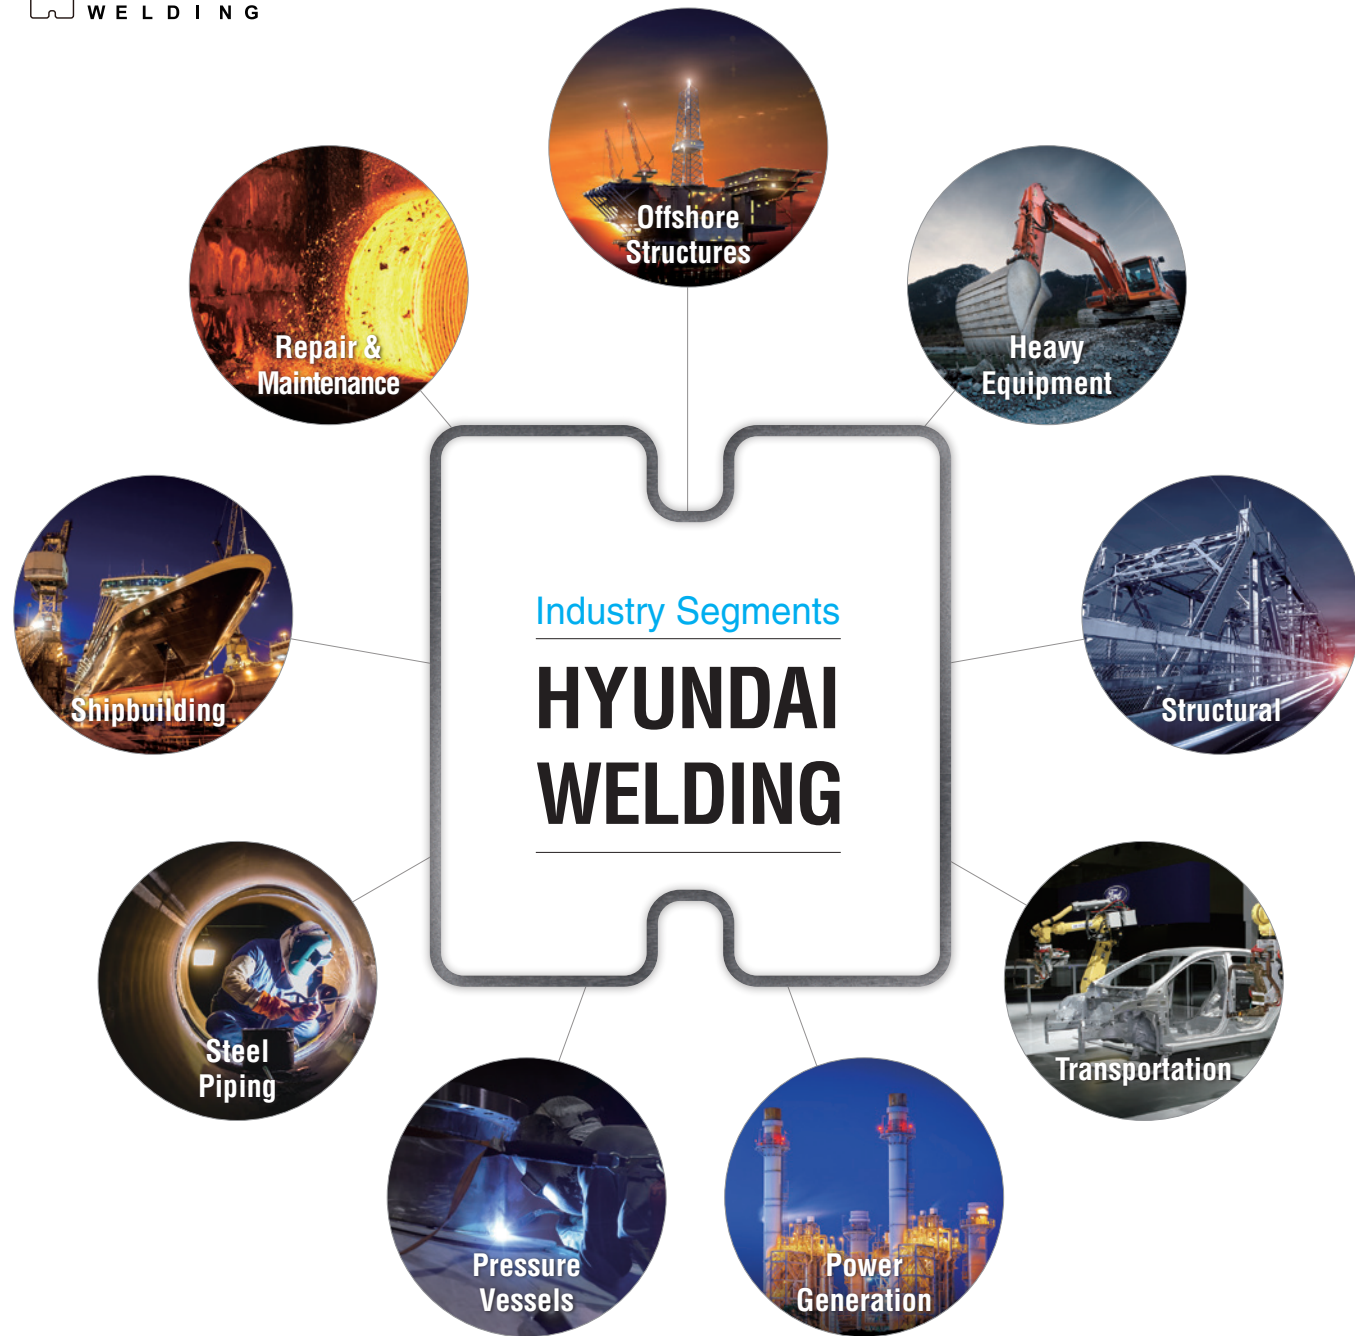

See the Difference with our Reliable Solutions

We provide a complete solution for our customers' welding applications.

HYUNDAI WELDING offers top-quality welding consumables and equipment-Stick Electrodes, Flux Cored Wires, Solid Wires, Submerged Arc Welding Wires and Fluxes, TIG Rods, and Welding Machines.

We are consistently updating and improving our product lines at our R&D Center located in Pohang, South Korea. Using our state-of-the-art facilities, our talented engineers are able to introduce new and improved products for our customers' needs.

Where there is steel, there is HYUNDAI WELDING

We understand the importance of welding technology and the need for innovative solutions to complex industrial problems in an ever innovating market. HYUNDAI WELDING can offer just that-the perfect tools of superior quality for the challenges that you face.

HYUNDAI WELDING offers a combination of quality-tested products and innovative technology to keep our customers ahead of the competition. Our proven track record illustrates our commitment in providing the world with industry leading quality throughout the field of steel fabrication.

HYUNDAI WELDING has been working with the world's top shipbuilding companies for decades. Our experts have provided efficient welding solutions to shipbuilders, all over the world, through our specialization in shipbuilding and repair. We are also a key supplier in the offshore industry, with a record of supplying significant projects around the world. HYUNDAI WELDING is also considered a premium brand in the Construction, Maintenance, and Energy industries. Our cutting-edge welding solutions in Automobile manufacturing have put us in close cooperation with Automotive and Heavy Equipment manufacturers all over the world. HYUNDAI WELDING is able to provide them with the most efficient, durable, and cost-efficient solutions for increasing their efficiency and competitiveness.
